

TOXORB

Mycotoxin inactivator
Mold inhibitor.

Toxorb is a high quality multifaceted technological binder able to control mycotoxin level in compound animal feed. Toxorb has a unique composition of Natural HSCAS (Hydrated sodium calcium aluminosilicate), Mannan Oligosaccharides (MOS), Organic acids, Activated charcoal.

HSCAS:

- Captation of mycotoxins.
- Very effectively binds aflatoxins.
- Binds of free radicals.
- Binds complexes excreted through faeces.

Mannan Oligosaccharides (MOS):

- Improves gut health.
- Improves immunity.
- Blocks the colonization of pathogenic bacteria.
- Blocks the adhesion of bacteria to the gut wall.
- Better intestinal health.

Activated Charcoal:

- High porosity for toxin binding.
- Binds undesirable chemicals.
- Better intestinal health.
- More weight gain.

Organic Acids:

- Kills harmful bacteria.
- Kills fungi.
- Provides optimal gut health.
- Better intestinal health.
- More weight gain.

Indications:

- Controls and reduces feed contaminations.
- Binds multiple mycotoxins.
- Inhibits growth of mold and prevents further mycotoxin production.
- Increases immunity and reduces stress on liver.
- Improves laying performance and growth in birds.

Inclusion Rate:

Toxorb is to be thoroughly mixed with finished feed at 0.5 - 1 Kg/ ton of feed.
Double the inclusion, when mycotoxin contamination is high.

Presentation:

25 kg
