

Ketolyte

Nutritional supplement for cattle

Ketolyte is mainly applied in nutrition of high yielding dairy cattle for prevention of ketosis.

Ketolyte is fermented in the rumen to yield propionic acid and gets partly absorbed through the rumen wall & partly absorbed in the small intestine. So, Glycerol is efficiently used in the glucose synthesis in the liver.

Composition:

Each ml contains
Gluconeogenic precursors with B-Complex Vitamins and Minerals.

Benefits:

Helps to bring back animal to feed & optimum milk production.
Helps to empower animals against ketosis.
Increases availability of energy.

Usage & Administration:

Usage & Administration:
Cattle :100-200 ml daily
Sheep & Goat: 100 ml daily

A product of :

Biochem
All we need is a healthy world
