

# HERBIOMETH

## Plant origin Methionine

Methionine is an essential amino acid which plays a major role in optimizing the growth and production, performance of Broilers, Layers & Breeders.

Certain plants contain high quality of methionine activity & other amino acids in a readily digestible form.

HERBIOMETH is developed from active plant material with high methionine activity.

Acts as methyl donor & can be more effectively use as compared to synthetic methionine.

### Benefits

- For better FCR.
- For maintaining optimum growth and production.
- To optimize egg production and bigger egg size in Layers and Breeders.
- For better performance of Layer, Broiler and Breeder birds.
- Provides energy so that birds remain in healthy & lively state.

### Feed Inclusion Rate

1 kg of HERBIOMETH can replace 1 kg of synthetic DL-methionine from poultry ration, with higher and sustained methionine activity.

### Presentation

25 kg bag
