

NI-Duracox provides a unique combination of ionophore maduramycin and chemical nicarbazine for synergistic action against coccidiosis. **NI-Duracox** offers superior performance in weight gains over higher level of nicarbazine or recommended levels of ionophores. It is an ideal starter for broader protection in a convenient year-round alternative to competitors both in price and performance.

COMPOSITION:

Each kg contains:

Nicarbazin	80 g
Maduramycin	7.5 g
Excipients.....	912.5 g

BENEFITS:

- Broad spectrum and high efficacy.
- Can be used in summer time (temperatures of 35 degree Celsius and above).
- Can be used in combination with common growth promoters.
- Anticoccidiosis effect can be enhanced when used combination with Innokit (Kitasamycin 20%) or Roxarsone.

INDICATION:

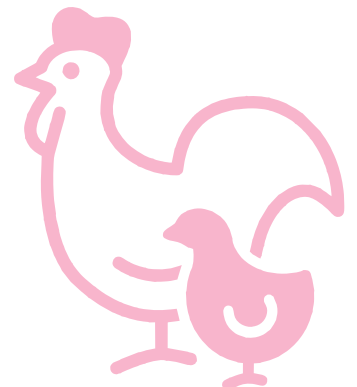

- As an aid in the prevention of coccidiosis caused by *Eimeria necatrix*, *E. tenella*, *E. acervulina*, *E. brunetti*, *E. maxima* and *E. mitis* in broiler chickens.

INCLUSION RATE:

500gm of Nicarbazin 8%+Maduramycin 0.75% Premix per ton of final feed.
Or as advised by the **Veterinarian**.

PRESENTATION:

25 kg
